

Francisco Herrera

480-516-2761 | Hereford, AZ | francisco.herrera.az@gmail.com | in francisco-herrera-az

Full stack software engineer with experience across multiple languages and stacks, specializing in C#/.NET and React for the past several years. A self-starter who takes full ownership of outcomes, recognized as a top strength during performance reviews. I enjoy collaborating with talented teams to solve complex problems and deliver impactful solutions.

SKILLS

- **Languages & Libraries:** C# .NET Core 8.0, JavaScript, Typescript, React, Hot Chocolate GraphQL, SQL, EF Core, HTML, Tailwind CSS
 - **Relational Databases:** Postgres, MySQL
 - **AI-Assisted Development:** GitHub Copilot, Claude Code
 - **CICD:** Git, Docker, Jenkins, Azure Devops, Test Automation
 - **Other:** Agile/Scrum, REST APIs, GraphQL, Clean Architecture
 - **Certifications:** Security+

WORK EXPERIENCE

Factory Mutual | Senior Full Stack Software Engineer Dec 2024 – Jul 2026

(C# .Net Web Api 8.0, GraphQL, React Typescript, Postgres)

- Designed and developed full stack features for a new web application used by field engineers to assess risks, hazards, and recommendations tied to corporate insurance policies.
- Built and maintained scalable ASP.NET 8 Web APIs, using Hot Chocolate for exposing GraphQL APIs and integrating with a PostgreSQL database.
- Developed many new frontend features using React and TypeScript, creating complex UI forms, modals, and navigation components to support data capture and editing workflows.
- Led the high availability migration of all backend services to support disaster recovery and multi-data-center resiliency.
- Managed app deployments to production using Azure DevOps Git and Pipelines.
- Collaborated closely with cross-functional teams in an agile environment, rapidly iterating and delivering high-impact features and bug fixes.
- Increased personal throughput by ~120% by adopting GitHub Copilot and Claude Code, while maintaining delivery quality across new features, bug fixes, and production support.

GODADDY | Senior Software Engineer | 2005 - 2024

Hosting Department (C# .Net, ReactJS, Postgres, Java)

- Designed and developed full stack features for customers on Shared Hosting, VPS, and Dedicated hosting.
- Developed web page for advanced support tooling only viewable by support agents.
- Architected process for collecting database data and sending to AWS Data Lake allowing for product queries and reports to be generated.
- Implemented JWT certificate authorization in product REST API.
- Implemented Cypress testing framework for the front-end interface which increased test coverage by 100%.

- Organized meetings with customer support leads to brainstorm new features for internal support tools. Using the feedback collected, I implemented new features for support tools.
 - Responsible for on-call and resolving customer issues. Regularly spent extra time on root cause analysis and created stories to fix them.
 - Mentored junior developers and provided thorough code reviews.
-

EDUCATION

Bachelor of Science in Computer Science | Western New Mexico University
